There was discussion among the (V)-~~(S)T*w)9BDC B308elcTBDC T0 1DC 01T0 1DC (h)-6aw6DC {v6DCw6DCwfc4B)9(~~

-
- Omar Ramos distributed two handouts and gave an overview of the 2011-2012 Program Review Resource Requests Report, and 2011-2012 Program Review Technology Plan Report.
 - Todd Finnell informed the group that the Technology Planning Committee would be reviewing the college's technology resource needs and making recommendations to the Program Review Committee. The committee is to look at student needs, the District's best practices, and determine if the resources requested fall within the scope of the Technology Plan's goals and priorities, or whether they need to be added.
 - The committee reviewed the 2011-12 Program Review Resource Requests Report for each ORG in detail.
 - There was discussion on the definition of a smart classroom which varies around campus depending on which building you are in. Todd Finnell informed the group that IT's vision would be to implement Thin Clients in all classrooms for faculty. This approach would allow faculty to have access to their own desktop from any classroom. A pilot of Thin Clients will be implemented this Summer in classroom labs 803 and 901.
 - Todd Finnell asked the committee for their recommendations.

- Gaylla Finnell recommended that the District prioritize those things that maintain the core infrastructure of the college. Edward Cesena agreed.
- Omar Ramos indicated he would like to see more virtualized classrooms and labs.
- Jeff Enz recommended that desktops older than five years be replaced; they would need to be a high priority, since VDI will take a couple of years to implement campus-wide.
- Daniel Bermudez agreed with the recommendation to replace desktops and implementing VDI.
- Larry - tmmC /Lpz2100 Tch ting VDd t uep-
