

Assessment Committee to ensure that programs are assessing outcomes in accordance with the schedules. This information will also be included in the follow-up report.

- Team members discussed which programs should have SLOs and which should have SAOs. Director Carrillo noted that the library, Admissions and Records, and other student services areas that deal with students currently have SAOs, not SLOs. Dr. Patterson stated his understanding that all programs that deal directly with students must have learning outcomes, have a regular schedule of outcomes assessment, and must conduct regular assessment. VP Tafoya stated she views the terminology as interchangeable. She explained that as long as an area has identified outcomes and is assessing them that is satisfactory.
- Dr. Tafoya revisited the goal of establishing consistent nomenclature; she recalled that Dr. Patterson had recommended “learning outcomes” instead of “SLOs” and “SAOs”. Dr. Patterson stated he had recommended the term “outcomes”. Director Carrillo stated the culture of the college has been to use the term “SLOs”. If the proposal is for the college to transition to the new terminology, he encouraged creating an awareness of the impending change in order to reduce confusion.

2. Recommendation 2 re: Evaluation of Processes and Systems Across Campus

-

- The meeting adjourned at 10:31 a.m.
